Client Meeting Prep: CDP Toolkit Migration

Group 19 • Thursday, October 8, 2026

Client. Interactivity Foundation (IF), Collaborative Discussion Project: Jes Friedrichs (sponsor), Rachael (requirements), Jasmine, Ellen; Jes to follow up with Shannon on the Website decision. Names to be confirmed with IF; shared only with IF and course staff.

Problem as we understand it (follow up to the October 1 requirements meeting). IF's open access Toolkit, 46 activities in five modules, each with a PDF, sits on Wix (collaborativediscussionproject.com), apart from the IF Website (interactivityfoundation.org, which appears to run WordPress). Two platforms cost money and split IF's content. IF chose to move the Toolkit to the Website, wants future updates to be easy while activities are being revised, and wants an agentic workflow that automates this work. We propose AI helpers that copy each activity faithfully as a draft for staff approval, plus a simple way to publish new ones.

1. The actionable problem

1. What takes the most staff time today when adding or editing an activity, and who does it?
2. In what form do new or revised activities start (Word, Google Docs, PDF)?
3. This semester covers the Toolkit only; which other workflows should we list as recommendations for later?

2. Context, constraints, and examples

4. Is the Website WordPress, and who manages it (staff, volunteer, or vendor)? Could we get a practice site or an editor account, and permission to view your Wix site's editor?
5. Should ratings and comments, coach only (login) resources, and certificate templates move too, or only the 46 activities?
6. Which version should we migrate while revisions are underway, and is there a freeze date?
7. May we add an activity page type, fields, and one page template to the Website (or must your web vendor do it)? Should pages follow existing layouts and filters (by module or level)?
8. Will you keep the collaborativediscussionproject.com address so old links still work? Who controls it, was it bought through Wix, and when does the Wix plan end?
9. When will Rachael's technical requirements be ready?

3. Data, NDA, and practice data

10. Do you want us to sign an NDA? May we process Toolkit content with Claude (Anthropic)?
11. Does any content include personal information (for example reviewer names in comments) that needs care?
12. If access takes time, may we work from the public pages and a private practice copy of the Website?

4. Success by December

13. Do these measures fit: all 46 activities moved; wording never changed and differences flagged; no broken links; a staff member creates a ready to review activity draft in 15 minutes? (We will show one example page.)
14. Who signs off, about how many staff hours can you give, and who will own the workflow after December?
15. Does IF have, or plan to budget for, Claude accounts after December?

5. Progress update and final presentation

16. Which date in mid November works for the progress update, in person or on Zoom?
17. For December 3: format, length, audience, and do both CMU teams present together?
18. Write up or video for your channels: which do you prefer, and who approves it by when?
